New 'Wintergreen' Boxwood
Photo March 1st, 1960

Scarff's New 'Wintergreen' KOREAN BOXWOOD

The Best Boxwood for the North

Holds its good bright green color throughout the winter in landscape plantings.

Excellent specimen or hedge plant.

Highly desirable for planter boxes or as a facing plant.

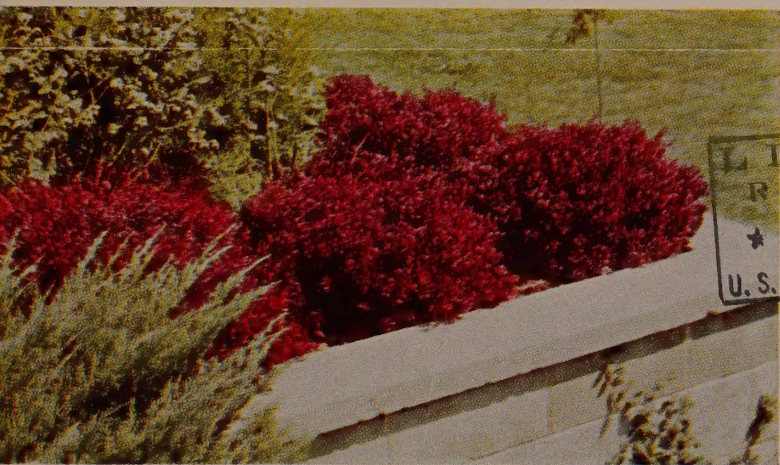

PYRACANTHA RUNYANA

Runyan Red Pyracantha *(Orange Red)*

We consider this to be the best of the redder types of hardy Pyracantha for the colder climates.

Very heavy fruiting with excellent color. Growth characteristics closely resemble la-landi.

'CRIMSON PYGMY' BARBERRY

Most colorful compact low landscape plant for edging or specimen planting.

Heavy, 3-yr. bedded and 2-yr. field plants available.

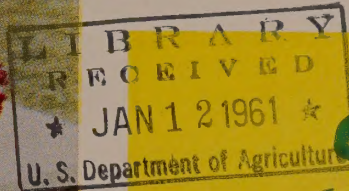

VIBURNUM, Tomentosum
'Mariesi'

VIBURNUM TOMENTOSUM 'Mariesi'

Improved Doublefile Viburnum

Horizontal branching with large flat clusters of creamy white flowers in May.

Brilliant fall color includes red berries and dark burgundy-red foliage.

Scarff's
NURSERY, Inc.
New Carlisle, Ohio

JAMES F. SCARFF

HOWARD N. SCARFF

WILLIAM N. SCARFF

BARBERRY MENTORENSIS

Semi-evergreen and entirely hardy here in Ohio.

Late fall coloring, beautiful shades of orange-red.

HAMAMELIS VERNALIS

(Winter Flowering Witch Hazel)

Earliest blooming shrub in spring.

Our propagations from plants with orange-red blossoms.

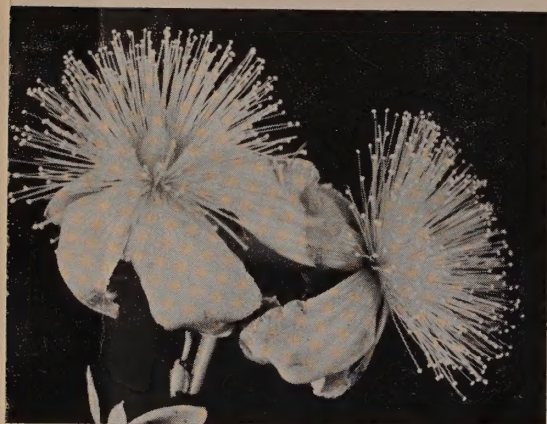

New!

'MIDNITE' BLACKBERRY

(Our Introduction in 1958)

We can unhesitatingly recommend this Blackberry for its fine fruiting performance and strong, thrifty canes in comparison to other Blackberry varieties. The berries are larger than Eldorado, jet black, glossy with small core and very high in quality.

HYPERICUM KALMIANUM

(Pot O' Gold)

Profuse blooms over a long period in mid-summer. Extremely hardy, widely adaptable. Low and compact with silvery blue foliage.

BUXUS SEMPERVIRENS

These original selections were made by Victor Ries, formerly Extension Ornamental Horticulturist, Ohio State University. In his travels throughout the state he observed these plants which had withstood the Ohio winters over a long period of years.

Wooster Hedge. Original plants at Orchard Field house—Ohio Experiment Station. Apparently quite hardy.

Victor Ries. From plants growing at Independence, Ohio. Hardy, deep green and vigorous grower.

Mrs. Miller. Original identity lost. Similar to Victor Ries. Has held up best of all here at our nursery.

CLAVEYS DWARF HONEYSUCKLE

(A Comparatively New Shrub)

Excellent for medium low hedge or landscape specimen plant. Attractive greyish green foliage. Red berries.

Scarff's RED CYDONIA

Upright, free blooming, almost thornless; a good, clean landscape shrub.

This selection is by far the easiest Cydonia to grow and handle in the nursery.

Scarff's Red Cydonia
